PROJECTS

Howler

<https://howler.herokuapp.com/>

- Responsible for managing all design projects
- Edits editorial photos for clients, magazines, and social media posts

Expense Tracker

<https://peaceful-castle-54704.herokuapp.com/>

- Developed a gamified finance application called Expense Tracker, using modern web technologies such as HTML, CSS, JavaScript, Node.js, Express.js, MySQL, Sequelize, and Handlebars, following the MVC paradigm.
- Used the Bulma CSS framework to create a responsive and modern UI for the application, including forms, buttons, heroes, and models.

Five Day Forecast

<https://beckamcnally.github.io/FiveDayForecast/>

- Created a web application that allows users to view the weather outlook for multiple cities using the OpenWeatherMap API.
- Utilized HTML, CSS, Bootstrap, and jQuery to develop the front-end of the application.
- Used Day.js library to manipulate date and time data.
- Utilized localStorage to store persistent data across sessions and dynamically updated HTML and CSS using JavaScript to display weather data.
